| Background of the legislation | San Marino should have a new general Law based on the UN CRPD sometime in 2013, including IL principles. In fact, this Law is postponing several other legislations needed to standardize PA, and to establish a Tutor who will assist with choice with the person with severe disabilities and not for the person . This in all financial, political and legal matters. |
| Type of legislation | No law as of yet |
| Administrator of PA services | |
| Funder of services | |
| Disabilities covered | |
| Possible amount of hours per day/week of PA | |
| Assessment of needs: tool and how often | |
| Hourly rate funded | Monthly allowances and a monthly pension are individually given to disabled people but there is no PA scheme to control the spending. The money is not distributed for PA but covers the expenses of the person. |
| Age | |
| Total of registered users in the country. | More or less 500 persons |
