### A) NORTH

<p>Background of the legislation</p>	<p>Italy continues to be in a situation of economic crisis and disability as a whole is dominated by the situation. The pre-election voting scheduled for the end of February is now opened, but the agenda of the coalition is very poor regarding possible improvements on disability rather the struggle of the IL associations is aimed to maintain what has been achieved so far. The main target is the actual enforceability of the basic rules of the UNCRPD, but still Italy is missing a definition of LEA (essential levels of assistance) and even more missing a definition of self-sufficiency.</p> <p>Laws are there and good practice as well, but there is a lack of political will and the difficulty of standardizing a regulation of access.</p> <p>ENIL Italy will be a member of the National Federation FISH to increase visibility and strength to push the enforceability of PA according to Art. 19 of the UNCRPD. Regional coordination has just been created (*) to raise awareness, promotion and development of PA in order to achieve IL. The few resources available slow down the action.</p> <p>There are conflicts due to old cultural settings, especially in the assessment phase. As mentioned before, the definition of self-sufficiency is lacking according to the innovative principles of the UNCRPD and subsequent national implementation.</p> <p>Reaching good legislation in accordance with the principles of the UNCRPD is the target of ENIL Italy as well as spreading the principles of the International Movement of Independent Living.</p> <p>* ENIL Italia Regional Teams</p> <p>-Piemonte: Associazione Consequor Onlus per la Vita</p>
